

comprising at least a colorant, and a resin liquid containing at least one photoreactive
 A2 bifunctional monofunctional monomer or at least one photoreactive bifunctional monomer,
 wherein a viscosity of the resin liquid at 25°C is 1.0 mPa's or more but 10.5 mPa's or less.

IN THE CLAIMS:

Please replace claims 1 and 7 as follows:

Sub B1
 A3 1. (Amended) An ink comprising: at least a colorant; and a resin liquid
 containing at least one photoreactive monofunctional monomer or at least one photoreactive
 bifunctional monomer, wherein a viscosity of the resin liquid at 25°C is 1.0 mPa's or more
 but 10.5 mPa's or less.

Sub B3
 A4 7. (Amended) A printed product comprising: an ink-receiving layer containing as
 a main component at least one resin selected from a group consisting of polyester resin,
 styrene-acrylic resin, epoxy resin, and phenoxy resin, and being formed an image on a surface
 of the ink-receiving layer, wherein the image is made with an ink comprising at least a
 colorant, and a resin liquid containing at least one photoreactive monofunctional monomer or
 at least one photoreactive bifunctional monomer, wherein a viscosity of the resin liquid at
 25°C is 1.0 mPa's or more but 10.5 mPa's or less.
